

# Nanoscience and nanotechnologies: opportunities and uncertainties

## Contents

page

<b>Summary</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Hopes and concerns about nanoscience and nanotechnologies	1
1.2 Terms of reference and conduct of the study	2
1.3 Report overview	2
1.4 Next steps	3
<b>2 What are nanoscience and nanotechnologies?</b>	<b>5</b>
<b>3 Science and applications</b>	<b>7</b>
3.1 Introduction	7
3.2 Nanomaterials	7
3.2.1 Introduction to nanomaterials	7
3.2.2 Nanoscience in this area	8
3.2.3 Applications	10
3.3 Nanometrology	13
3.3.1 Introduction to nanometrology	13
3.3.2 Length measurement	13
3.3.3 Force measurement	14
3.3.4 Measurement of single molecules	14
3.3.5 Applications	14
3.4 Electronics, optoelectronics, and information and communication technology (ICT)	17
3.4.1 Introduction to electronics, optoelectronics, and ICT	17
3.4.2 Nanoscience in this area	17
3.4.3 Current applications	17
3.4.4 Applications anticipated in the future	18
3.5 Bio-nanotechnology and nanomedicine	19
3.5.1 Introduction to bio-nanotechnology and nanomedicine	19
3.5.2 Nanoscience in this area	20
3.5.3 Current and future applications	20
<b>4 Nanomanufacturing and the industrial application of nanotechnologies</b>	<b>25</b>
4.1 Introduction	25
4.2 Characterisation	25
4.3 Fabrication techniques	25
4.3.1 Bottom-up manufacturing	26
4.3.2 Top-down manufacturing	28
4.3.3 Convergence of top-down and bottom-up techniques	29
4.4 Visions for the future	30
4.4.1 Precision Engineering	30
4.4.2 The chemicals industry	31
4.4.3 The information and communication technology industry	31
4.5 Resource management and environmental issues	32
4.6 Barriers to progress	32
4.7 Summary	33

<b>5</b>	<b>Possible adverse health, environmental and safety impacts</b>	<b>35</b>
5.1	Introduction	35
5.2	Assessing and controlling risk	35
5.3	Human health	36
	5.3.1 Understanding the toxicity of nanoparticles and fibres	36
	5.3.2 Manufactured nanoparticles and nanotubes	41
5.4	Effects on the environment and other species	45
5.5	Risk of explosion	47
5.6	Addressing the knowledge gaps	47
5.7	Conclusions	49
<b>6</b>	<b>Social and ethical issues</b>	<b>51</b>
6.1	Introduction: framing social and ethical issues	51
6.2	Economic impacts	52
6.3	A 'nanodivide'?	52
6.4	Information collection and the implications for civil liberties	53
6.5	Human enhancement	54
6.6	Covergence	54
6.7	Military uses	55
6.8	Conclusions	56
<b>7</b>	<b>Stakeholder and public dialogue</b>	<b>59</b>
7.1	Introduction	59
7.2	Current public awareness of nanotechnologies in Britain	59
	7.2.1 Quantitative survey findings	59
	7.2.2 Qualitative workshop findings	60
	7.2.3 Interpreting the research into public attitudes	61
7.3	Importance of promoting a wider dialogue	62
7.4	Nanotechnologies as an 'upstream' issue	64
7.5	Designing dialogue on nanotechnologies	64
	7.5.1 Incorporating public values in decisions	66
	7.5.2 Improving decision quality	66
	7.5.3 Resolving conflict	66
	7.5.4 Improving trust in institutions	66
	7.5.5 Informing or educating people	66
7.6	Conclusions	67
<b>8</b>	<b>Regulatory issues</b>	<b>69</b>
8.1	Introduction	69
8.2	Approaches to regulation	69
8.3	Case studies	70
	8.3.1 Workplace (including research laboratories)	70
	8.3.2 Marketing and use of chemicals	71
	8.3.3 Consumer products incorporating free nanoparticles, particularly skin preparations	72
	8.3.4 Medicines and medical devices	74
	8.3.5 Consumer products incorporating fixed nanoparticles: end-of-life issues	74
8.4	Knowledge gaps	74
	8.4.1 Hazard	74
	8.4.2 Exposure	75
	8.4.3 Measurement	75
8.5	Conclusions	76

<b>9</b>	<b>Conclusions</b>	<b>79</b>
9.1	Nanoscience and nanotechnologies and their industrial application	79
9.2	Health, safety and environmental risks and hazards	79
9.3	Social and ethical impacts	81
9.4	Stakeholder and public dialogue	81
9.5	Regulation	82
9.6	Responsible development of nanotechnologies	83
9.7	A mechanism for addressing future issues	84
<b>10</b>	<b>Recommendations</b>	<b>85</b>
<b>11</b>	<b>References</b>	<b>89</b>
<b>Annexes</b>		
<b>A</b>	<b>Working Group, Review Group and Secretariat</b>	<b>95</b>
<b>B</b>	<b>Conduct of the study</b>	<b>97</b>
<b>C</b>	<b>List of those who submitted evidence</b>	<b>99</b>
<b>D</b>	<b>Mechanical self-replicating nano-robots and 'Grey Goo'</b>	<b>109</b>
<b>Acronyms and abbreviations</b>		<b>111</b>
